

SAFESTICK[®]

ENCRYPTED FLASH DRIVE - MANAGED

MANAGED BY

CONFIDENTLY CARRY YOUR DATA ON THE GO

DataLocker SafeStick offers affordable security with 256-bit AES hardware-based encryption in XTS mode that provides always on protection for your data and **REQUIRES** central management with **SafeConsole**. SafeStick offers advanced protection while maintaining control and audit capabilities without compromising security.

FEATURES + BENEFITS

- 256-bit AES hardware encryption (XTS Mode)
- Unlock in Read-only mode to prevent files from being modified or infected with malware
- Configure inactivity Auto-Lock to prevent unwanted access
- Device will lock after 10 incorrect login attempts and require a password or a device reset (configurable with policies through SafeConsole)

CENTRALLY MANAGED

SafeStick must be centrally managed with SafeConsole, a secure cloud or on-premises management platform that allows your organization to centrally manage SafeConsole compatible USB storage devices easily and efficiently.

- Enforce device specific security policies such as password requirements and restrict where devices can be utilized
- Mitigate risks of data loss by remotely disabling or detonating lost, stolen or compromised devices
- Securely reset forgotten passwords
- Recommission devices that are no longer in use for secure redeployment
- Remotely configure read-only mode
- Protect against malware and other threats with McAfee Anti-Malware Scanner*

SafeStick requires a SafeConsole device license per device. License sold separately. For more information visit datalocker.com/SafeConsole
