

SAFECONSOLE® ENCRYPTION MANAGEMENT PLATFORM

MANAGE ALL YOUR  SAFECONSOLE Ready®
DEVICES FROM A SECURE COMMAND CENTER

NEVER LOSE TRACK OF YOUR SENSITIVE DATA

DataLocker encryption solutions make it simple to secure data for transport, storage and sharing. Now SafeConsole allows you to centrally manage those devices, no matter where they go.

SafeConsole is your secure storage command center for encrypted devices, including the DataLocker DL3/DL3FE encrypted external hard drives, DataLocker Sentry® 3 FIPS encrypted flash drive, SafeCrypt® cloud encryption gateway and EncryptDisc® self-encrypting optical media.* Other SafeConsoleReady® products include devices from our partners like Kingston® Technology and CardWave®.

SafeConsole is ideal for mobile employees that are handling sensitive data or intellectual property in multiple locations. SafeConsole allows you to administer hundreds or thousands of encrypted devices with efficiency, visibility and control.

FEATURES OF SAFECONSOLE

Inventory. Monitor all your encrypted devices, including their location anywhere in the world. Integrate with Active Directory to track users, assigned devices and connected computers with ease.

Audit. See which files are saved to or deleted from your encrypted devices at any given moment. Use a complete audit trail to monitor activity by user, including connections, login failures, resets and loss reports.

Control. Enforce policies such as password rules, file-type restrictions or geographic boundaries. Reset passwords, switch devices into read-only mode, and even remotely wipe them in case of loss or theft.

Report. Gain a big-picture view of your encrypted devices across the globe. Access reports by configuration, geographic location, status, updates, recent activity and more.

* SafeCrypt and EncryptDisc support coming soon.

ADDITIONAL FEATURES

GEOLOCATION AND GEOFENCING

Use IP-based location tracking to pinpoint the location of your encrypted devices anywhere in the world. SafeConsole can also “geofence” your devices, making them accessible only within specific geographic boundaries.

EASY AND RAPID DEPLOYMENT

SafeConsole offers an easy deployment for small and large organizations with connection to Active Directory (AD). Administrators can authenticate to access SafeConsole with their AD credentials. Install SafeConsole on your server, then deploy drives to user(s). Each device is registered to a specific user in SafeConsole and linked to the user in the corporate directory (if available).

PUBLISHER

This feature allows administrators to deploy or push portable applications and content to the secure storage volume of the managed devices.

ZONE BUILDER

Zonebuilder is a tool to create a “trusted zone” of computers that makes using your SafeConsole managed devices even more Simply Secure.

 **RESTRICT** device access to computers inside your Trusted Zone.

 **AUTO-UNLOCK** your storage device eliminating the need to enter your password. This feature uses RSA client certificates for authentication.

ANTI-MALWARE SERVICE

In partnership with McAfee, DataLocker offers anti-malware protection that runs in the background of your managed devices. The McAfee application scans the device upon each use, detecting and cleaning malware from the device and reporting back to SafeConsole so you know exactly which devices were infected and how they were sanitized.

With McAfee seamlessly integrated into your devices, you and your organization stay compliant and avoid incidents that can result in high maintenance and service costs.

Powered by 

SAFECONSOLE[®] ENCRYPTION MANAGEMENT PLATFORM

CENTRALLY ADMINISTER USAGE, PASSWORDS, AND MORE

Police device use and access by leveraging a broad range of flexible policy and password management controls.

- Enforce device-specific rules for password length and complexity, password change frequency, and more.
- Enable help desk admins to easily and remotely help users who have forgotten their passwords.
- Restrict the ability to use drives on certain computers by whitelisting specific IP addresses or address ranges.
- Remotely reset devices, reset passwords, update policies, force read-only mode, disable or even detonate devices from anywhere in the world.
- Activate and administer optional McAfee Anti-Virus protection software on some or all of the devices you manage.
- See which files are saved to or deleted from your encrypted devices at any given moment.
- Restrict which file types are allowed to be stored on the managed devices.

MANAGED DEVICES

DataLocker Sentry ONE Managed* Flash Drives

The Sentry ONE is FIPS 140-2 level 3 validated and utilizes AES 256-bit hardware encryption. This next generation, USB 3.1 GEN 1 flash drive delivers ultimate portability and security.

DataLocker H300 / H350 Enterprise* External Hard Drives

Combining AES 256-bit hardware encryption, a FIPS 140-2 level 3 validated option, USB. 3.0 performance and a competitive price. The H300/H350 offers security, performance and value.

DataLocker DL3 / DL3 FE (FIPS Edition) External Hard Drives

With AES 256-bit hardware encryption, a FIPS 140-2 level 3 validated option, USB. 3.0 performance and a rotating touch screen keypad the DL3 boasts speed, storage, and security.

Kingston DataTraveler Vault Privacy 3.0 / 4000 G2 Flash Drives

Safeguard your company's sensitive data and protect sensitive data with 256-bit AES encryption.

*Managed/Enterprise models require a SafeConsole device license - license sold separately
Legacy SafeConsole Supported Devices include: Sentry 3 FIPS, Sentry 3.0, and Sentry FIPS

FLEXIBLE DEPLOYMENT OPTIONS

CLOUD-HOSTED SERVICE

Up and running in minutes

Log in and manage from anywhere

Email and phone support

Priced per endpoint/year plus a one-time base fee

ON-PREM

Requires a dedicated Windows-based server

Log in and manage from anywhere

Modest hardware and bandwidth requirements

Ideal for deployments of 300 or more devices

PCI COMPLIANCE

For SafeConsole Cloud, our data centers have been certified by national and/or international security standards. Also, please note that SafeConsole Cloud is a single tenant solution, meaning that only your company's service is hosted that specific virtual server. Also, no actual data from the storage products is saved on the cloud. Only SafeConsole, the management console, is hosted on the cloud.
