

Quick Start Guide

1

Connect the USB cable to the DL2 device and to your computer's USB port.

2

Power on the DL2 and enter the default password (six zero's): 000000 and touch the return key.

3

After entering the password, Select "Setup" on the touch screen.

4

Select "Change Password" and follow the on screen instructions.

After setting up the password, the DL2 is now ready for use.

Warning: Please save password in a secure location as we are not able to recover your password for you. **A lost or forgotten password cannot be reset or recovered without losing all of the stored data.**
