

# DATALOCKER SAFECONSOLE CENTRAL MANAGEMENT

DataLocker's on-prem or cloud-based platform lets you easily provision, secure, manage, and audit encrypted USB drives, USB ports, and encrypted virtual drives from anywhere. Ask about custom cloud roll-outs, Gold support, and our enterprise features.

Enhance security for portable USB drives and workstation USB ports

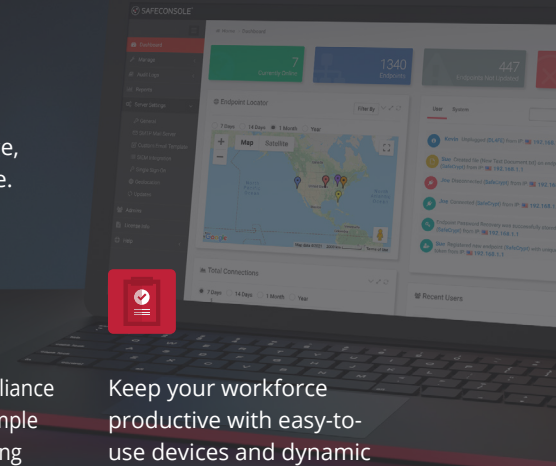

Reduce time spent deploying and managing secure USB drives

Make tracking and compliance for secure USB drives simple with sophisticated auditing and reporting tools

Keep your workforce productive with easy-to-use devices and dynamic security postures

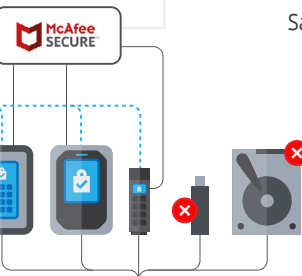

## SAFECONSOLE<sup>®</sup> DEVICECONTROL

Remotely provision, configure, manage, and audit your fleet of encrypted USB drives, while also unlocking powerful security features for DataLocker drives.

## SAFECONSOLE<sup>®</sup> ANTI-MALWARE

On-board McAfee<sup>®</sup> anti-malware is always on to scan files on secure USB drives, remove or quarantine malware threats, and report information back to SafeConsole.

## SAFECONSOLE<sup>®</sup> SAFECRYPT

Store and secure local or cloud data in an encrypted virtual drive.

## SAFECONSOLE<sup>®</sup> PORTBLOCKER

Ensure that your workforce only uses approved USB devices to prevent malware intrusion or accidental file loss.
